EXECUTIVE SUMMARY

Automated Entrance Examination of Central Philippines State University- Victorias City Campus is aimed primarily on creating an easy and more accurate automated system. This benefits the school in their facilities such as maintaining the questionnaires safe specially the system itself. This automated system is the answer to the problem of the school, for giving the entrance exam and checking the test paper of each student. The proponents decided to make an automated entrance examination for easiness of both the test takers and the management. The automated entrance examination provides easy work to the examiner to answer the question. The advantage of this system is that it lessens the time of the personnel involve. They build this system because they want to help the institution to give easiness in giving the entrance exam to the upcoming students. And this system is very understandable and easy to manage and the user will not be confused of what to input. The manual system is time-consuming in giving the exam and checking the test papers of the students. And being a manual process, there are lots of errors occur. So this comes up to because it is easier to give and check the exam and this will offer an immediate release of the result of the students. And because of this the enrollees do not need to use lots of papers for summation and pencils to write on the test papers and in order to erase those wrong answer. And also based on the evaluation from the students and the faculty they got a score of 22 and the 1st that has a highest rating is the User- Friendly and the 2nd is the Accuracy and Security, 3rd is Reliability and the lowest is Speed and Storage capacity. And the objective of this system is to computerize the questionnaire and also to lessen the works of the faculty. And this system aims to automate the entrance examination of Central Philippines State University- Victorias City Campus. By implementing this Automated Entrance Examination this will be going to tested in the said institution and going to make an evaluation to the selected students and faculty of Central

Philippines State University. Why Automated Entrance Examination instead of written? Because automated entrance exam is more reliable than the written exam. Most of the school is using an automated entrance exam you don't need to worry about filing the exam and after taking the examination the result of your exam will be printed and will be saved to the server this system is the best way to lessen the work of the Registrar or faculty and the student it is easy and fun questions are changeable by using this program it can enhance your critical thinking because every questions have a limited time for you to answer.
