ABSTRACT

RYAN C. GARCIA, LAILANIE B. JEMILLA, and RAN PATRICK T. VISTAR of Central Philippines State University – Victorias Campus, Negros Occidental, July 2023. **Readiness of Bachelor of Elementary Education Students towards Practice Teaching.**

Adviser: Ms. Meldy S. Lubrico

Practice teaching is one of the important components necessary to become a teacher. It gives different experiences to practice teachers in the real classroom practices which include teaching and learning. This is also a preparation to expose them to the real-world aspect of the teaching profession and to assist them put into practice the theoretical knowledge acquired during their college year (Somosot, 2020).

Descriptive-comparative design was used in this study. Using the descriptive-comparative approach, this study made comparisons of the likeness and differences among phenomena to determine whether certain factors or circumstances (i.e., content knowledge and pedagogy, learning environment, diversity of learners, curriculum and planning, assessment and reporting, and personal growth and professional development) tend to accompany certain events, conditions, or processes, in this case, readiness towards practice teaching. In line with this, the study carried out the permission of the researchers' instructor and research adviser. Moreover, the study used self-made questionnaire based on the DepEd order No. 42, s.2017 or the Philippine Professional Standards for Teachers to gather information and collect data from the respondents.

The results show the computed grand mean of the extent of the Readiness of Bachelor of Elementary Education Students towards Practice Teaching has the value of

4.0015 which is interpreted as High Extent. This only implies that the third-year Bachelor of Elementary Education students of Central Philippines State University - Victorias are ready to undergo practice teaching. It also shows that the value of sex of the respondents is significant in their readiness towards practice teaching. In line with this, the age and civil status shows no significance to the Readiness of Bachelor of Elementary Education Students towards Practice Teaching.

Keywords – readiness, practice teaching, content knowledge and pedagogy, learning environment, diversity of learners, curriculum and planning, assessment and reporting, personal growth and professional development.
