Extent Of Academic Stressors In Cpsu – Victorias City Campus.

Adviser: Jonas D. Singson

This study aimed to determine the Extent of Academic Stressors in CPSU – Victorias City Campus. The respondents of this study were the students of CPSU-Victorias City Campus who were enrolled for the school year 2014-2015.

The descriptive method was used in this study using the standardized questionnaire of Gadzella's Student-life Stress Inventory, Beard and Ragheb's (1980), Time Management Behaviors (TMB) and (1980) State-Trait Anxiety Inventory Form Y (STAI-Y) to answer the set of objectives. Appropriate statistical tools such as Frequency and Percentage Distribution for problem number 1, mean for problem number 2 and Analysis of Variance for problem number 3 were used to obtain the results needed.

After a thorough analysis of the accumulated data, the researchers found out that among the 280 respondents, majority were females, aging 18 to 23 years old and mostly were fourth year.

The findings revealed that the respondents of this study encountered academic stressors. In terms of Anxiety, they experienced average level. Under Time Management category, they got average level. As a whole, they experienced average level of stress. In addition, it was found out that females experienced more stress compared to males. There
