ABSTRACT

EMELIO S. BURAY JR., GIL GLEN L. MAGDUA, JOAN A. TALAGA, Central Philippine State University, Victorias City, Negros Occidental. July 2023. "Assessment On Career Readiness of First Year Hospitality Management Students Of Central Philippines State University-Victorias Campus"

Advisor: Jeniffer Gonzales

This study examines the Assessment on Career Readiness of First Year Hospitality Management Students Of Central Philippines State University-Victorias Campus. The research was conducted at Central Philippine State University Victorias Campus using a descriptive method. A self-made questionnaire was utilized to gather data to determine the extent of career readiness among BSHM first-year students. The researchers employed the mean and standard deviation as their statistical tools. The objective of this study is to assess the perceived level of career readiness among first-year students at Central Philippines State University-Victorias Campus, focusing on areas such as food and beverage service, food product and services, front office operations, housekeeping, management skills, and risk management. The findings of this study can serve as a foundation for future research or be replicated with different respondents and additional variables. Moreover, the results can offer insights for personal studies and serve as a conceptual framework for further research. Based on our study shows that there is a significant difference on assessing on career choices of first year student. This according to gender result of .020(p-value) and strand during SHS 0.198(p-value) this implies that the student did not meet there career choice to there college course in terms of SHS strand and sex. This result help to the student on how to come up there other units that not related to there strand during SHS and how to

improve their skills. The study found out that students are more skilled in front office operation with a grand mean of 3.64. As interpreted as a very high extent. Student determined on how well student knowledgeable on front office operation and on how the student performed well in front office operation. Therefore the result of this study help to the instructor on how to the student more on focused. It is recommended that students engage in skills development training and programs, whether conducted face-to-face or online. Seeking internships and mentorship opportunities can provide students with numerous advantages, including valuable experiences that contribute to the development of solid professional abilities in areas such as food and beverage service, food product and service, front office management, housekeeping, management skills, and risk management. The First-year Career Readiness Survey results show that first-year students are not a homogeneous group. Tvl students in senior high school are more career-ready than other strands, but they do not have as much social or cultural capital. Time and budgetary constraints are significant barriers to their involvement in certain career-related activities.
